Strategic Goals

Well-planned infrastructure

1 Bring together business, community and government throughout South Australia to make sure new and existing infrastructure most effectively addresses opportunities and challenges to better support economic development and quality of life for current and future generations.

Prioritised investment

2 Provide oversight and assurance of high capital value (\$50 million+) or high-risk projects over their lifecycle to enable governments to make evidence-based decisions. Provide signals to industry on the State's priorities to encourage private sector investment.

Improved practice

3 Build rigour in infrastructure planning and delivery via improved coordination, business case development and appropriate assurance frameworks to support financial integrity and sustainability, facilitate policy reform and remove duplication and other inefficiencies.

High-performance organisation

4 Comprise highly knowledgeable and respected people who share a common vision and goals, work together effectively and hold each other accountable in order to achieve exceptional outcomes.

Vision

That efficient and evidence-based infrastructure planning and delivery will grow the economy, create jobs and improve liveability for all South Australians.

Guiding Principles

Grow the economy and create jobs

Infrastructure builds prosperity by raising productivity, improving access to markets and increasing business confidence.

Improve access to services

Infrastructure connects cities and regions, people and services.

Holistic and integrated

A coordinated approach to infrastructure delivers better outcomes.

Be economically efficient

Existing and new investments are optimised to best meet real needs and deliver value for money.

Purpose

To provide independent and valued expert advice to government to enable informed and integrated decisions on infrastructure planning, investment, delivery and optimisation.
