Subject: 19CALHN3151 | 20-Year State Infrastructure Strategy submissions

Good morning,

I have attempted to use the link available on the Infrastructure website to upload our submission, however it keeps looping back to the first page after completing the second section. Please see below the submission completed by Elke Kropf, Director Operational Services, on behalf of CALHN.

CBD

- Car Parking availability in the western precinct with RAH, WCH and new Calvary Hospitals all located there.
- CBD hospitals are already at peak demand, what are the alternate solutions to meet future demand?
- Per point above – traffic flow/accessibility given the above
- Affordable short and long term accommodation for the public given the above
- Smart parking options integrating with technology.
- Public amenities i.e. cafes , supermarkets given above
- Urban growth, population growth and aging population impacting on major CBD hospitals.
- Other infrastructure links to hospitals and health facilities.

Western

- Extension of Tram line down port road – assist in traffic flow per above

General

- Accessibility to technology for general population with a view to allow consultations at home or ongoing treatment after discharge for aging /growing population?
- Asset management – good approach outlined in the paper, however there will need to be integration and support from other parts of government to ensure this can be implemented, such as Treasury and AGFMA.

Kind regards,

Office of the Chief Executive Officer
Central Adelaide Local Health Network
